

Description

Nasal cannula (nasal prongs), device designed for easy administration of oxygen into the patient nose through two small prongs placed in the nostrils, providing comfort for the patient.

The device consists of:

Over-the-Ear tubing adjustable

Size selected: Neonate

Single use, Non-sterile.

Length of the oxygen tube: +/- 2 m.

Material: Preferably soft and kink resistant polyvinyl chloride (PVC).

Soft funnel shaped connector to facilitate easy connection to oxygen source.

Soft twin prongs nasal tips to ensure equal oxygen flow to both.

Adjustable, smoothly finished nasal tips for maximum patient comfort.

Star lumen main tube to avoid accidental blockage.
